Extreme Spa Covers*

Blanket

INSTRUCTIONS

Place blanket on warm spa water and allow to "relax" until flat. Be sure spa is filled to the proper level and carefully cut the blanket with a scissors to snugly fit the contours of your spa. It's easiest to first cut the blanket to the proper square/rectangular shape, then cut any curves and contours. NOTE: Additional clearance may be required around the inlet of some skimmers and filter intakes.

Warranty

The Insulator Spa Blanket is warranted to the original purchaser, to be free from defects in material and workmanship, under normal usage, for a period of 1 year (12 months) from the date of delivery to the original consumer. Such limited warranty does not cover damages caused by animals, fire, vandalism, excessive chemicals, improper installation and strain, abuse or abrasion, acts of God or use for purposes other than that for which the cover was designed. Ordinary wear and tear is not considered to be a defect in workmanship or material. Any expressed or implied warranty is limited in duration to 1 year from the date of delivery to the original purchaser-consumer. Seller shall not be liable for any incidental or consequential damages. Any Insulator Spa Blanket deemed by us to have failed due to defects in materials or workmanship within one year from date of purchase will be repaired or replaced, at our option, without charge for materials or labor (excludes cost of freight to and from the manufacturer).

Warranty does NOT cover improper use, or any of the following:

Damage from sunlight. The Insulator Spa Blanket is neither designed nor intended to be used as the sole cover for a spa and has little resistance to UV light.

Damage from excessive chemical usage. Inefficiently installed ozonators and top loading bromine feeders can off-gas excessively and cause unwarranted damage.

Any damage resulting from any misuse, abuse, negligence, acts of God, accident or alteration

The Insulator Spa Blanket is not a safety cover and should not be used alone. Use only in conjunction with an ASTM safety cover. Always completely remove before using your spa.
